PROFILE SUMMARY

- **A competent** professional with **nearly 3 years** of experience in **Software Development & Engineering, Back-End Development, Project Management** across **Banking domain.**
- Expertise in **managing complete SDLC** including design, development, enhancements, customization, requirement gathering & analysis, testing, coding.
- Rich experience in **supporting development & maintenance of multiple applications**; actively contributed in various phases of development **right from requirement analysis, implementation, deployment.**
- Successfully led the project execution in tune with the business objectives; reviewed functional requirements and translated the same into technical specifications.
- **Client-centric professional** with excellence in understanding clients' requirements and designing a roadmap for further product development.
- **Top performing team player & quick learner** with capabilities in rendering technical guidance to the team members at all levels across the organization.

CORE COMPETENCIES

- Software Development Lifecycle
- Back-End Development
- Requirement Gathering & Analysis
- Cross-Functional Coordination
- Technical Reporting & Documentation
- Project Execution & Management
- Client/Stakeholder Engagement
- Debugging/ Troubleshooting
- Cross-Functional Coordination

TECHNICAL SKILLS

- **Programming**: Java, Kotlin, Python
- **Database-Management**: PostgreSQL, Redshift, MySQL
- **Development**: Spring Boot, Micro Services, RabbitMq, AWS-SES, Nats, Redis, Maven, Graalvm
- **Others**: OMNI Payments

WORK EXPERIENCE

Since Dec'23 **Mintoak Innovation Pvt. Ltd., Mumbai as Software Engineer (Back-End)**

Key Result Areas:

- Effectively maintainign the settlement application for multiple banks, ensuring the precise and timely execution of financial transactions.
- Steering implementation of GraalVM compatibility for a critical application, optimizing memory usage and enhancing application performance.
- Providing information related to software bugs & defects by analyzing and summarizing development & service issues.
- Rendering support in Software Development lifecycle, right from requirement gathering, documentation (functional specifications, technical designs), coding and testing.
- Working towards documentation, API creation and user interface as per client requirements.
- Assisting in managing projects with respect to cost, resource deployment, time overruns and quality compliance.
- Communicating with clients & users, mapping & implementing requirements and following up with them throughout the project lifecycle to ensure full understanding of needs and concerns.

Highlights:

- Engineered and upheld payment functionalities for SBI Yono Merchant App, HDFC Smarthub Vyapar App, and Axis Neo, managing over 4 Million transactions per day.
- Designed and built the Service Action Module for HDFC SmartHub App from the ground up, now processing 50k service requests daily.

Jul'22-Dec'23 **Cogoport Pvt. Ltd., Mumbai as Software Engineer (Back-End)**

Key Result Areas:

- Championed the complete development lifecycle of an Export Factoring and Pay Later product onboarding platform, driving it from ideation to final deployment.
- Crafted and rolled out an intuitive interface for efficient management of Account Payables and Receivables, accelerating invoice processing and trade financing.
- Coordinated stakeholder task allocation for documentation, ensuring smooth communication flow and systematic execution.
- Established a real-time notification system, keeping stakeholders informed at every stage, thereby cutting process delays and boosting collaboration.
- Instituted a role-based access control mechanism, providing administrators with full operational visibility while safeguarding data security and regulatory compliance.
- Devised and deployed targeted dunning email campaigns through automation, improving overdue account management and elevating customer engagement.

Highlights:

- Embedded risk assessment models to assess customer creditworthiness, minimizing payment default risks and strengthening portfolio quality.
- Engineered a seamless onboarding workflow that enabled clients to register, upload documentation, and activate accounts, slashing onboarding time by 40%.
- Constructed an in-house loan management framework featuring loan tracking, interest computation, payment scheduling, and financial system integration, reinforcing financial oversight and stability.

INTERNSHIP

Organization: Flipkart, Assam as Intern (Departmental Manager - Motherhub Ops)
Period: Feb'22-Jul'22
Highlights:

- Overhauled return operations at the Motherhub, cutting return processing time by 12% through streamlined workflow.
- Supervised supply chain functions, driving a 30% enhancement in goods processing efficiency at the sorting center.
- Partnered with cross-functional teams, delivering a 10% decline in sorting errors and strengthening logistics coordination.
- Devised and executed innovative strategies, elevating the sorting center's productivity by 10% and minimizing operational hurdles.
- Analyzed operational data to pinpoint improvement opportunities, achieving a 5% drop in return-related breaches.

EDUCATION

2022 **B.Tech. in Civil Engineering with 7.36/10 CGPA** from Maulana Azad National Institute of Technology, Bhopal, M.P.
